- 3-Why do people from all over the world go to Hawaii?
- 4-What is meant by scuba diving?
- 5-What do you know about the "Lei and Hula"?
- 6-Why is the ozone layer important?

## **B- Reading Comprehension**

### **5- A-Read the following passage, then answer the questions below:**

In the United States and in many European and Arab countries, there is a serious problem. What should be done with the garbage? There is no more room for garbage dumps. It is not possible to burn garbage, because that pollutes the air. So the governments are looking for ways to reduce the amount of garbage that is produced. One way to do this is to grind as much as possible. Not all kinds of garbage can be ground, of course. The easiest things to grind are probably glass and paper. However, one can also grind many kinds of metal and plastic. Many cities now require people to put these materials in special

containers separately from the regular garbage. Then special trucks take them away and bring them to private companies. These companies will buy them and use them again.

**Questions:-**

- 1-What is the common problem for almost all countries?
- 2-Why shouldn't people burn garbage?
- 3-What can the governments do to help solve this problem?
- 4-How can people help in solving this problem?

**B-Read the following passage, then choose the correct answer :**

The police find most criminals by using science and computers. When there is a bank robbery, the police first look through their computers for the names of bank robbers they know about. Then they go and talk to any of these robbers who are not in jail. They ask them where they were at the time of the robbery. If any of these people cannot give an answer, the police will often use science to find out if one of them is the robber. Many criminals leave something of themselves at the place of the crime. If they leave some of their blood or a hair or a piece of skin, it will have their DNA inside it. Everyone's DNA is different. Therefore, if a criminal cuts himself during a robbery or leaves a hair, scientists can find out what his DNA is. The police can then ask the person they think is the criminal to give them a hair or some blood to see if it has the same DNA.

**Choose the correct Answer:**

- 1-The police use.....to find criminals.  
a-jail                      b-science                      c-mathematics                      d-skin
- 2-Every piece of our bodies has our.....  
a-fingerprint                      b-hair                      c-robbery                      d-DNA
- 3-Have you ever met .....  
a-a robbery                      b-a DNA                      c-some blood                      d-a criminal
- 4-The underlined word "them" refers to .....  
a-the police                      b-bank robbers                      c-people in jail                      d-robberies

**Critical Thinking:**

**6-Read the following and then choose the best ending, a, b, c or d:**

Supermarket managers have all kinds of tricks to encourage people to spend more money. Their aim is to make customers go more slowly through the supermarket. They place colorful displays in surprising places to catch the customers' attention. They also make the corridors near the cash registers more narrow. Then with large shopping carts will get stuck or have to slow down. In some supermarkets, the floor is even slightly uphill for people going towards the exits.
