## 3) Read the following, then answer the questions:

The boat was one of the first forms of transport. A hundred years ago, the only way to make a journey was by boat. Nowadays, it is possible to fly from one continent to another in a few hours. However, many passengers still have fun while travelling by boat. Although the boat is a rather old-fashioned way of travelling, it has certain advantages. To begin with, the boat is usually more comfortable than a plane or a car. Instead of staying in your seat for the whole journey in the plane or the car, you can go for a walk on the deck, eat in the restaurant or even do shopping on the boat. However, having more space to move around makes a long journey much more pleasant. So, you can travel by boat if you have much time.

One of the hobbies that people like is to collect things such as stamps, books, old coins and ancient pictures. But the strangest collection I have ever seen belongs to a man who owns four hundred clocks. There are clocks in every room of his house. The living room is surrounded by shelves which had been filled with clocks.

As there is not enough room for so many clocks, the man filled several trunks and stored them in the garage. His wife complains every day about the work she has to do, as it is not easy to dust several hundred clocks. She also complains about the noise, that each clock keeps its own time. She never knows exactly what time it is.

A Answer the following questions:

3) Read the following, then answer the questions:

In ancient Egypt, like today, most of our important cities were built along the Nile. For this reason, people have used the river for transport for many years. The people also became experts at building boats. In around 4000 BCE, the ancient Egyptians made small boats from papyrus. They used oars to move them forwards. **Later**, they used wood tied together with ropes to build boats. They also invented the first sail in order to move faster up the river when the wind blew.

In around 2500 BCE, people began to build larger and stronger boats. After that, ships were built to travel across the sea to sell goods in other countries. Ships needed the wind until the early 1800s, when the first steamships began to cross the sea. In the twentieth century, oil was used to take powerful ships around the world.
