6 - Read the following passage then answer the questions:

Corona viruses are a group of viruses that infect the respiratory tract of both humans and animals. The virus has a crown-like projection on its surface, which is how it got its name. There are many different species of the virus. Human corona virus was discovered in 1965. It affects all age groups and is most common during the winter and early spring. In young children and older people, human corona virus can affect the lower respiratory tract as well. People who already have underlying health conditions may be more susceptible to the infection problems. Human corona virus can cause runny nose, general feeling of illness, mild sore throat, cough, headache, low fever and chills. Many people get corona virus for a second time within four months after having it the first time. Scientists believe this is because the antibodies created to fight the corona virus only protect a person for four months. A relatively small amount of information is known about human corona viruses because most of them do not grow in cultured cells, making it difficult to study them. In order to reduce the risk and prevent the spread of infections, simple preventative measure are: good respiratory hygiene, including washing hands; avoiding touching one's eyes, mouth and nose; sanitary disposal of oral and nasal discharges as well as avoiding contact with sick people.

A) Answer the following questions:

Egypt as I think and dream

مصر كما أحلم بها

Egypt , my beloved home country , is the Cradle of Civilization مهد الحضارة . So , I have always been thinking of it as the land of peace and love . I have always been dreaming of Egypt as the most modern and advanced country . A country in which people respect and tolerant to each other . A country in which law is applied and respected . A country in which discrimination has no place among citizens , regardless their religious or political beliefs . A country in which everyone has his work and lives in a safe home . I have been dreaming of Egypt like this as it has all the factors to be a pioneering country in all fields , with its great location and culture . Finally , I think my dream is up to achieve after the struggle of its youth to have their freedom and opportunity to live a decent life . حياة كريمة .

"The role of the internet and the Facebook in affecting people."

دور الانترنت والفييس بوك فى تاثيره على الناس

Modern technology plays an important part in our life. All modern equipment such as television, computers, mobiles , and all other devices are based on the highest technology. We can't imagine life without means of transport .They enable us to travel long distances easily, comfortably and in a short time .In addition, modern means of communications enable us to keep in touch with the latest events at any part of

the world in no time by means of satellite or the internet .At the same time , the mobile is in hand . It is really a breakthrough in communication .We can't imagine life at homes without electric sets. It will be dark and dull without TV. The refrigerator helps housewives to preserve food to use later .Washing machines help housewives to do washing easily and quickly. In the field of medicine it is easy for surgeons to perform operations thanks to modern equipment . In fact .Thanks to technology, our life is enjoyable and comfortable.

" Terrorism""Violence" "Spreading crimes and bullies البلطجة " " Crime doesn't pay " الجريمة لا تفيد

It is clear that crimes have increased in alarming rate nowadays. No day passes without hearing about a crime on TV or in the newspapers. In fact there are many reasons for spreading crimes in our society. These may be because of unemployment problem, ignorance, illiteracy, poverty, over population and the lack of religious awareness. These crimes cause fear, horror and insecurity among citizens. Crimes are always committed without any persuasive reasons. Criminals must know the fact that any crime doesn't pay and the criminal must be revealed how long he escapes. He also must know that he must obtain his penalty. The family, the school, the mosque, the church and the government must cooperate together to find a solution to this serious problem which threatens our life.

The necessity of reducing our consumption of water and electricity

ضرورة تقليل استهلاكنا من المياه والكهرباء

It is known that energy and water are the basis and the artery of life. All living things and machines can't live or work without them, however energy and water are about to run out. Therefore we mustn't ignore these problems otherwise we will lead hard lif .All of us must seek hard to rationalize using them .The Nile is the only source of water in Egypt. So we must keep it clean and use its water only when necessary. We mustn't be wasteful at using its water. We mustn't forget to rationalize using electricity. From my point of view, there are many simple ways to rationalize electricity for example we should switch off electric sets after using them. We must spread the awareness of the importance of rationalization among citizens to avoid this serious problem .We can use natural light by day . The Minister of education asked for rationalization of consumption of water and electricity in schools and education departments . At last not at least we can say that consumption rationalization of water and electricity need great interest from us.

Increasing Production and encouraging investments are the only ways for Egypt to reach the shore of safety.

زيادة الانتاج وتشجيع الاستثمارات هما طرق مصر للوصول لير الامان

Egypt nowadays is facing a great challenge. It wants to cross this critical transitional stage مرحلة إنتقالية to reach the shore of safety. In order to attain this sublime goal, هدف سامي Egypt is in a hard need of more efforts, more sacrifice and more self-denial. شعارات إنكار الذات There is no time for slogans and cheers. Actions speak louder than words. All Egyptians must realize this fact to forget about their political attitudes and serve their beloved Egypt. Every one of us should do his duty fully to make up for the time lost. We must bear in mind that increasing production is the only way for stability and safety. With it, we can increase our income and pass the burdens of life. Moreover, we have to encourage investments by all possible means.
