I think they behaved badly.

15. What do you think might have happened if Black Beauty continued to work for Skinner a long time?

I think he was going to die as he wasn't given enough food and didn't have enough energy.

16. Do you think that Skinner was a bad owner? Why?

Yes, because he didn't give Ginger and Beauty enough food and made them weak.

17. Why do you think that the people who looked at Black Beauty at the market were very poor?

Because he was put with the horses that were old or ill-looking.

18. Why were holidays not always an easy time for taxi drivers?

Because holidays were not common for them. They had to work very long hours for seven days without a rest to get enough money for their families.

19. Why do you think Beauty couldn't pull Skinner's carriage up a hill?

Because the carriage, the four passengers and their bags were too heavy.

20. Do you think the Earl really loved the horses? Why?

No, because they liked the latest fashion most and used reins which were uncomfortable to the horses.

21. Why do you think Ginger stopped kicking people who weren't good to her?

Because she is not strong enough to do that. Men are always stronger than her.

22. Why do you think that Black Beauty felt sorry for some of the taxi drivers and their horses?

Because they had to work for seven days a week without rest.

23. What is the moral of the story?

We should be kind to working animals.

24. Why do you think that Black Beauty was sold at part of the market where the horses were old or ill-looking?

Because he was thin and ill.

25. Why do you think the reins were uncomfortable?

Because they kept the horses' heads high in the air all the time while they were pulling the carriages.

Technical schools

After finishing Preparatory School at 15, some students choose to stay in general education, but about sixty percent of students go to technical schools. Students at technical schools learn skills that they can use in the world of work. These skills are extremely important for the future of the country. Because technology changes all the time, the skills that people need today are very different to what was needed ten or twenty years ago. There are now many more technical schools around Egypt and each school teaches a different kind of technical skill. For example, students can learn about work in hotels and shops, or learn skills needed for industry, farming or nursing. Students study at these schools for three or five years.

The latest technology

Technology is changing all the time, so it is important to learn about the latest developments. Many jobs now require you to know how to use social media. Some companies now use social media to advertise jobs and to arrange interviews. In fact, if a person didn't know how to use social media, it might be more difficult for them to find work. How we send messages is also changing. In the past, you could only send emails using a computer. Now you can send texts or emails on a mobile phone or tablet. Social networking sites allow you to send messages to many people at the same time.

A story you read

Last week, I read an interesting story about an ant and a grasshopper. It was summer and Ant was collecting food for the winter. Grasshopper looked very content as he sat in the sun. Grasshopper hadn't done any work all week. "Don't be foolish," said Ant. "You know that it's hard to find food in winter. What could you do if you didn't have any food?" "It's still summer!" said Grasshopper. "I refuse to think about winter yet!" When the winter came, Ant had found enough food to eat until spring. Grasshopper remembered Ant's wise words, but he was very hungry.

The solar system

There are eight planets in our solar system. They are all different sizes. Only two planets in the solar system don't have any moons. One planet has 62 moons and one has 67. Three of the planets are smaller than earth. The earth's moon is round many of the other moons

are different shapes and sizes. We can't feel the earth moving. The earth turns around itself at about 1,670 kilometres an hour and more than 100.000 kilometres an hour around the sun. The most important thing to remember about this is that when something is moving all time, you can't feel it, like when you are on a train.

Social networking sites

I want to tell you about the importance of social networking sites. Social networking sites has many users. Egypt has nearly 50 million users. It's very important to make new friends. It allows to send messages to many people. People type everything on their social sites. These sites are necessary if people are far from each other. Some companies now use social media to advertise jobs and to arrange interviews. If a person didn't know how to use social media, it might be more difficult for them to find work. If you want to get a good job , you should understand how to advertise products on social media.

Addiction

Addiction is very dangerous. It happens when your body needs something strongly. It has different shapes. Some people become addicted to coffee or video games. They feel nervous if they can't do that. Some people become addicted to cigarettes. Cigarettes are bad for health. There are two ways that people can become addicted to something. A physical addiction is when your body thinks that it needs something. For example, you may think that you must have a cigarette to wake up in the morning. Your body will think that something is wrong if you do not have that cigarette. It is very hard for people to stop feeling like this.

A journey you plan to go on

I'm going to spend my weekend in Alex. It's so beautiful. There are many nice places to see. I'm going to stay in my uncle's house. He lives in Alexandria. I'm going to go to the beach in the morning. I'm going to go go diving. I like seeing beautiful sea animals. In the afternoon, I'm going to play football with my cousins on the beach. It might be fun. Alex is a beautiful city which has many beautiful bazaars where I can buy souvenirs and presents to my family. I'm going to go shopping at the end of my visit.

With my best wishes to you
